Welcome Address

Prof. Andreas Karwautz

We are very happy to welcome you at the 18th Congress of the European Society for Child and Adolescent Psychiatry (ESCAP) in the Imperial Palace – Hofburg in the very city centre of Vienna from 30 June to 2 July 2019.

ESCAP has jointly organized this congress with the “Verein zur Förderung der Kinder- und Jugendpsychiatrie in Österreich (ÖFV-KJPP)” on behalf of the “Austrian Society for Child and Adolescent Psychiatry, Psychosomatics, and Psychotherapy (ÖGKJP)” in Vienna. We have combined our efforts from all over Europe to shape a programme covering a wide range of topics appealing to both clinicians and researchers. We wish to stimulate exchange based on novel research and treatments.

Vienna has been a multi-cultural city for centuries with an outstanding history in psychiatry and psychotherapy rendering the city an ideal location for this international meeting of child and adolescent mental health professionals.

The programme particularly focusses on the development of etiological, diagnostic, and treatment related aspects of mental disorders and symptoms in young people. A major global challenge is to shape developmentally based multimodal treatments and prevention strategies for children and adolescents in multi-ethnic societies. Child and adolescent psychiatry needs to provide answers within this world of change and challenges.

A few topics with specific relationship to Vienna and Austria have been highlighted using the format of “podium discussions” following symposia:

1. The origins of autism in the terrible time of national socialism in Vienna
2. The significance of psychotherapy in the field of child psychiatry
3. Suicide prevention in the context of depression and transport and
4. Substance use prevention – a topic which has been organized together with the UNODC based in Vienna

Prof. Stephan Eliez

Welcome to Vienna!
